

AI Policy Labs in partnership with Indo-British All Party Parliamentary Group  
event on

## Digital Revolution, Future of Bilateral Trade & Potential Partnerships between the UK – India

19 May 2021 | 10.00 am - 12.00 pm BST | Online

Opportunities for greater collaboration in the domain of science and technology in the growing era of Artificial Intelligence provides us with the potential to revitalise the UK-India bilateral cooperation. From mainstream consumer businesses to potential research partnerships between the countries, AI has the disruptive capacity and the potential to revolutionise trade.

As part of the **UK- India AI Partnership Programme of the AI Policy Labs**, this discussion is in partnership with the **Indo-British All-Party Parliamentary Group (APPG)**. We aim to provide an elevated platform to various international stakeholders, technologists, policy experts, technology designers to facilitate discussion between both countries. We are acting as an enabler of strengthening the UK-India relationship through cooperation with inclusive development. Through this program, we aim to catapult partnerships between UK & India through dedicated research, capacity building programmes, podcasts, events, and other medium of communication to advice policy development. These activities aim to catalyse practical action for AI and explore the potential areas of cooperation, bringing about a lasting change in the digital infrastructure and research in both the UK and India.

The event '**Digital Revolution, Future of Bilateral Trade & Potential Partnerships between the UK-India**' is scheduled on **May 19 2021, 10:00 AM - 12:00 PM, BST**. This is the second event in the series of our joint *UK-India AI Partnership program*. The first part of the series was an internal roundtable with Parliamentarians, with participants from more than 5 APPGs and global experts laying the foundation for the program. This event aims to

- a. Achieve superior synchronisation of new technological developments in the two countries to impel greater openness to trade and opportunities
- b. scan the horizon of potential opportunities for UK-India collaborative engagements to enhance partnerships
- c. and to prepare business in both the nations to make the most of this disruptive change.

With the All-Party Parliamentary Group, we are aiming to build a platform to bring together the parliamentarians from both countries and the senior level policymakers to engage with key stakeholders in the future of AI, including business leaders, investors, academics and, civil society interest groups to join us for the series of events.
